

Run 1620 | Observed Signature and LLM-Mentioned Evidence

Frozen IF reference | 96 channels x 29 features | 259/259 valid detector subruns | strict threshold $|z| > 8$ | 5 saved Sol trials

Matrix: digitizer-only model; original feature order and settings. Orange label [n] = explicit text mention in n/5 trials, not internal model attribution.

Max values are NOT clipped; nonlinear color scale resolves both small and million-scale z . Frequency uses each cell's own valid-subrun denominator.

Grey = undefined / masked / no data, not zero. Missing channels are excluded from cell denominators and separately counted below. Orange cell borders require an explicit channel-feature link.

OBSERVED MATRIX

259/259 subruns have defined z values; 0 missing/empty/no- z .

0 cells exceed $|z|>8$ in at least 80% of their valid subruns.

Most persistent cells (not a cause ranking):

ch9 / nPulses_median: 2.7%; max 9.32; n=259.

ch65 / nPulses_median: 1.2%; max 13.1; n=259.

ch20 / nPulses_median: 1.2%; max 11.2; n=259.

ch0 / nPulses_median: 0.8%; max 45.8; n=259.

LLM-MENTIONED EVIDENCE

Counts are trials, not word occurrences.
Text counts include hypotheses/checks; observed-section mentions are shown separately.
restart (proposed or hypothesized): 5/5 text; 0/5 observed-section.
board matching: 5/5 text; 0/5 observed-section.
trigger rate: 5/5 text; 5/5 observed-section.
LVDS: 5/5 text; 5/5 observed-section.
readout failure/dropout: 1/5 text; 0/5 observed-section.
configuration: 1/5 text; 0/5 observed-section.
Unambiguous target-observation cell links: 0.
No channel-feature Cartesian expansion. Generic pulse statistics, LVDS pins, mask state and missing-channel text remain notes.

PHASE 1 DIAGNOSES (saved category)

Trial 1: transient_DAQ_processing_or_restart_anomaly

Trial 2: transient_DAQ_readout_disruption

Trial 3: suspected_daq_processing_or_auto_restart_transient

Trial 4: suspected_DAQ_transient_or_auto_restart

Trial 5: daq_auto_restart

Reading across trials: DAQ transient/restart direction recurs; the concrete cause remains unknown.

Category text is reproduced from saved responses; it is not a true-cause label.
